ORIGAMI DIAGRAMS

Corner Bookmark

The origami corner bookmark is a small square with a triangular pocket that slides over the corner of a page to mark your place. It is an easy model folded from one square in four steps and takes about three minutes, which makes it a favourite classroom craft.

DIFFICULTY
Easy

TIME
About 3 min

STEPS
4

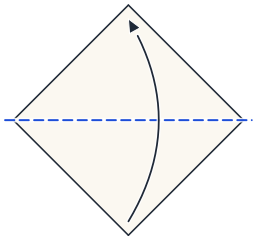

PAPER
One square, 15 cm (6 in), which makes a bookmark

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

Corner Bookmark - origami diagram

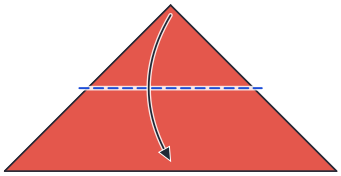

Easy - 4 steps - 3 min

1

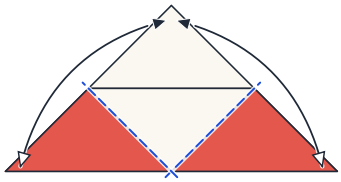

Turn the square so it sits like a diamond with the white side up, then fold the bottom corner up to the top corner to make a triangle.

2

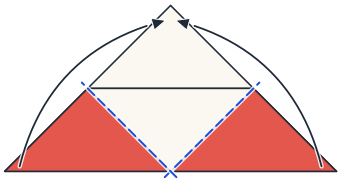

Take just the front layer at the top corner and fold it down so its point touches the middle of the bottom edge. This small triangle forms the pocket.

3

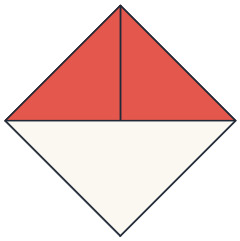

Fold the left and right corners up so each point meets the top corner, which turns the model into a square. Crease well, then open both corners back out.

4

Fold the two corners up again along the same creases, but this time slide each one inside the pocket so it goes under the front triangle.

Done

Your corner bookmark is ready: slide the pocket at the bottom corner over the corner of a page and close the book. Draw eyes, teeth or ears on the front to turn it into a monster, animal or character.
