ORIGAMI DIAGRAMS

Fish

The origami fish is a simple flat fish with a blunt nose and an upturned tail, folded from a kite shape made from one square. It is easy and takes about four minutes, so it suits children and complete beginners.

DIFFICULTY
Easy

TIME
About 4 min

STEPS
5

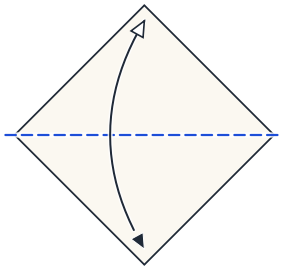

PAPER
A 15 cm (6 in) square in any color

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

Fish - origami diagram

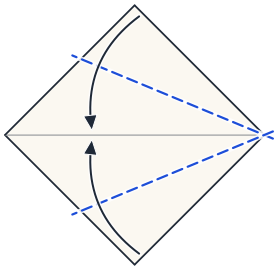

Easy - 5 steps - 4 min

1

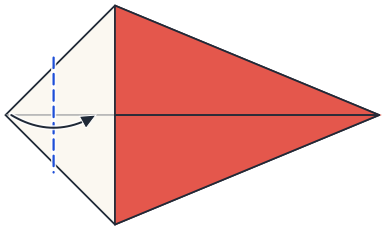

White side up in a diamond, fold top to bottom, crease, and open.

2

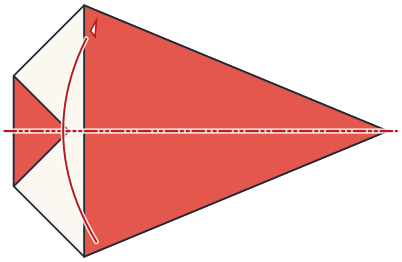

Fold both right-hand edges to the center line so they meet, forming a kite that points right.

3

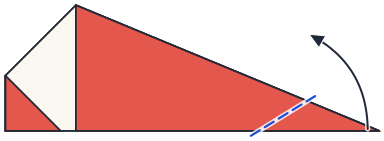

Fold the left corner in slightly to blunt the nose.

4

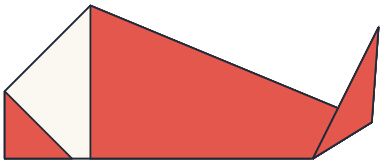

Mountain fold the model in half along its horizontal middle, sending the lower half behind.

5

Fold the narrow tail upward at an angle through all layers so the tail flicks up.

Done

Draw an eye close to the nose. Glue several fish in assorted colors onto blue card for an aquarium scene.
