ORIGAMI DIAGRAMS

Fox Face

The origami fox face is a pointed fox head with tall ears, folded from one square in five steps and finished with drawn eyes and a nose. It is an easy model that takes about three minutes.

DIFFICULTY

TIME
About 3 min

STEPS
5

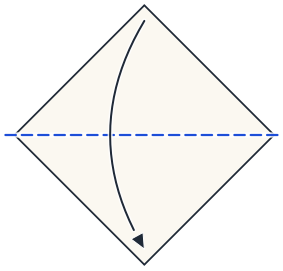

PAPER
A 15 cm (6 in) square, traditionally orange

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

Fox Face - origami diagram

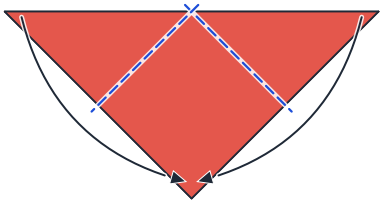

Easy - 5 steps - 3 min

1

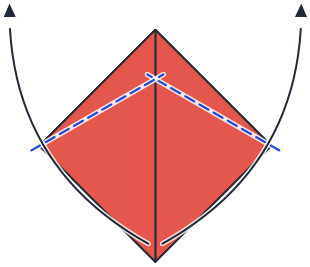

Place the square as a diamond, white side up, and bring the upper corner down onto the lower one.

2

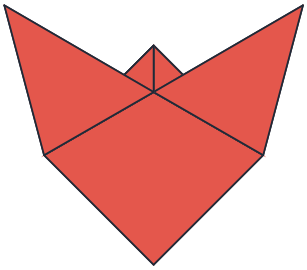

Carry both side corners down to the lower tip so a smaller diamond forms.

3

Working from each flap's outer corner, fold its lower half upward and outward so the tips poke above the top edge as ears.

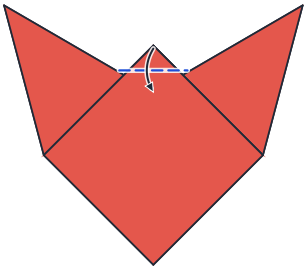

4

Turn over

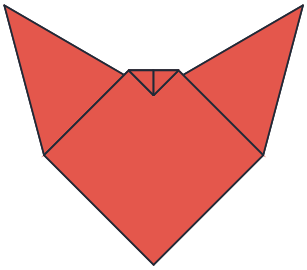

Flip the model over.

5

Fold down a small amount of the top corner to flatten the crown between the ears.

Done

Add eyes and a black nose to the pointed snout and the fox face is finished.
