ORIGAMI DIAGRAMS

# Ghost

The origami ghost is a flat Halloween ghost with a round, domed head and a wavy hem of three points, folded from one square with the white side showing. It is an easy model with five steps and takes about three minutes; you draw the eyes and mouth on at the end.

**DIFFICULTY**
Easy

**TIME**
About 3 min

**STEPS**
5

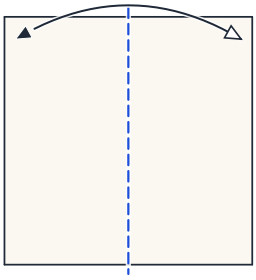

**PAPER**
A 15 cm (6 in) square, white on at least one side;

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

# Ghost - origami diagram

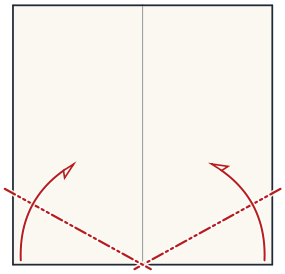

Easy - 5 steps - 3 min

1

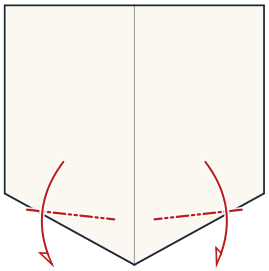

Lay the square with the white side facing up, fold it in half from left to right, and open it again so a vertical crease marks the middle.

2

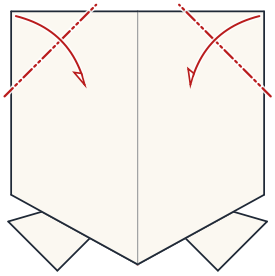

Fold the two bottom corners behind along slanted lines that start about a quarter of the way up each side and meet at the bottom end of the centre crease, so the bottom of the ghost becomes a wide, shallow point.

3

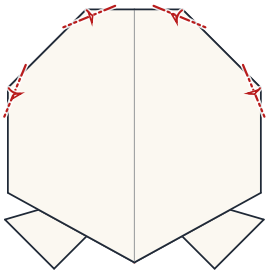

Reach behind and fold each hidden corner back down so its tip pokes out below the slanted edge, pointing straight down and level with the middle point. The ghost now has a wavy hem with three points.

4

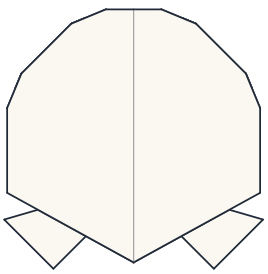

Fold both top corners behind along short diagonal lines, about a third of the way along each edge, to give the head its shape.

5

Fold the four small corners around the head behind by a tiny amount so the top becomes a smooth, rounded dome.

## Done

Your ghost is finished: a round head and a wavy, pointed hem, all in white. Draw two big oval eyes and an open mouth with a black marker, and it is ready to haunt a window, a card or a Halloween garland.
