

Easy kids plane - A4 fold lines. Print at 100% (Actual size), printed side up.
Blue dashes: valley fold (towards you). Red dash-dot: mountain fold (away from you).
Numbers are the steps on page 2. Grey dots near the back edge: bend up here for elevators.

How to fold the Easy kids plane

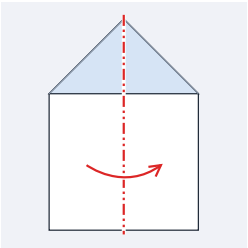

Difficulty: easy - best for: First flights. Start with page 1 printed side up.

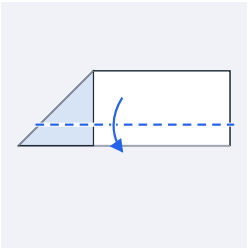

1 Lay the sheet portrait, printed side up. Fold it in half lengthwise, crease firmly and unfold again. The centre crease is your guide for every fold that follows.

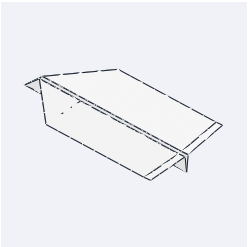

2 Fold both top corners in to the centre crease so the top becomes a point.

3 Turn the plane over and fold it in half along the centre crease, so the folded flaps end up on the outside. Turn it so the nose points left.

4 Fold the top wing down along a line parallel to the bottom edge, about 2.9 cm (1 1/8 in) above it. Turn over and fold the other wing to match.

5 Open the wings until they are level. Pinch the body closed under the wings so it does not spring open in flight.

Throwing and trimming

- Hold it under the wings, close to the nose, and push it forward gently and level.
- Throw indoors or on a calm day: broad, light wings are blown about by wind.
- Dives: curl the back edges of both wings up slightly.
- Swoops up and falls back: the back edges are bent up too much, flatten them.
- Wings flapping open: hold them level with a small piece of tape across the body under the wings.
