ORIGAMI DIAGRAMS

Paper Hat

The origami paper hat is the classic triangular newspaper hat, often worn as a pirate or admiral's hat, folded from a single rectangle with no tape. It is an easy model that takes about three minutes, and a double sheet of newspaper makes one big enough for a child or an adult to wear.

PAPER
A rectangle: a double newspaper page for a wearable

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

Paper Hat - origami diagram

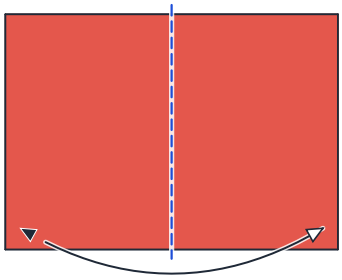

Easy - 8 steps - 3 min

1

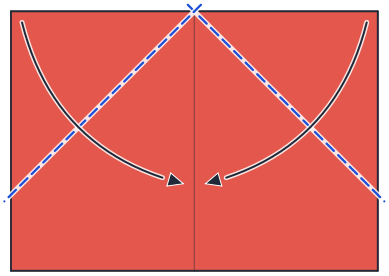

Hold the rectangle tall with the white side facing you and bring the top edge down to the bottom edge. Crease along the top.

2

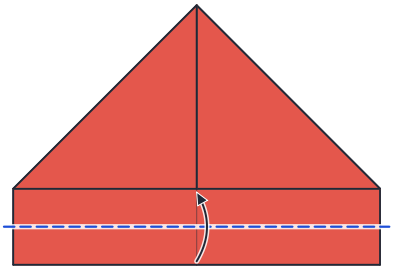

Fold the paper in half from left to right, crease, and open it again so there is a vertical centre line.

3

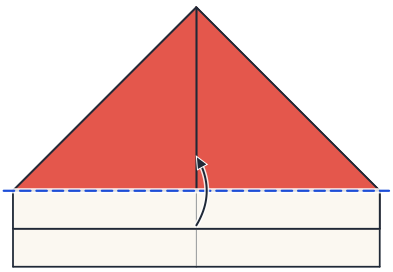

Keeping the folded edge at the top, fold each top corner down so its edge lines up with the centre line. The two triangles meet in the middle.

4

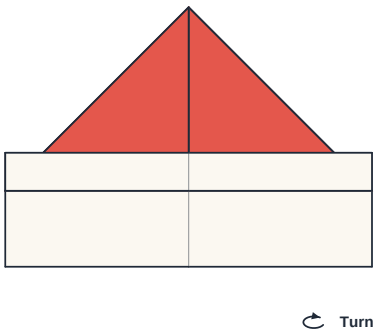

Take only the front layer of the strip below the triangles and fold its bottom edge up until it touches the bottom of the triangles.

5

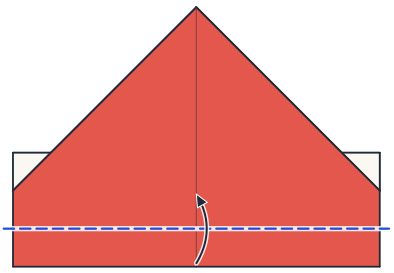

Fold the strip up once more, along the bottom of the triangles, so it lies over them as a double-thick brim.

6

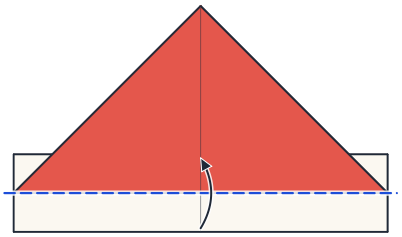

Flip the model over.

7

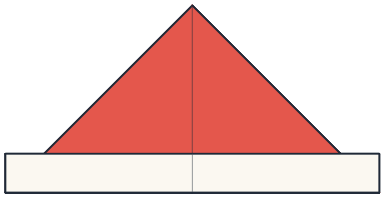

On this side, fold the bottom edge of the remaining strip up to the bottom of the triangle.

8

Fold that strip up again along the bottom of the triangle to make the second brim.

Done

Slide your hands inside the bottom edge and spread the hat open. Wear it point up for the classic newspaper hat, or turn it sideways with the points front and back for a pirate or admiral's hat.
