ORIGAMI DIAGRAMS

Tulip

The origami tulip is a flat flower head made from a single square in three folds, designed to be joined to a separate folded stem. It is one of the easiest models on the site and takes about three minutes.

DIFFICULTY
Easy

TIME
About 3 min

STEPS
3

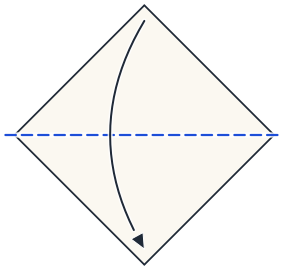

PAPER
A 15 cm (6 in) square in a flower color such as red,

- Valley fold (toward you)
- Mountain fold (away)
- Existing crease

Tulip - origami diagram

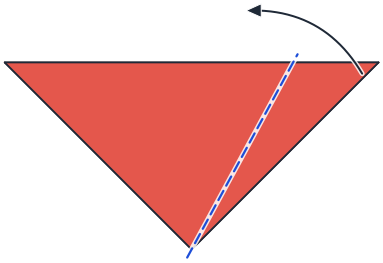

Easy - 3 steps - 3 min

1

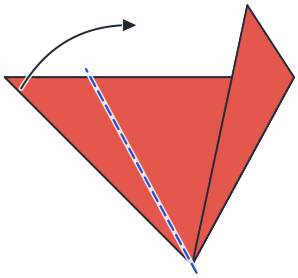

Lay the square as a diamond, white side up, and bring the upper corner down onto the lower corner to form a triangle.

2

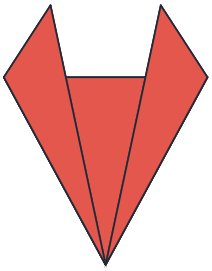

Swing the right-hand corner upward on a fold that starts at the bottom tip, so the point rises above the top edge and leans slightly outward.

3

Mirror that fold with the left corner. These two points form the outer petals.

Done

The tulip bloom is finished. Make a stem from a green square (see the Tulip Stem diagram) and tuck its tip into the opening beneath the bloom.
